

Guided Cave Dives 2024

Guided cave dives in the local freshwater cenotes are available for all certified cave divers, trained by a recognized cave diving training agency. The caves of the Riviera Maya are among the most beautiful in the world with visibility well in excess of 150 feet/45 meters, stalactites and stalagmites of every shape and size and light zones that will dazzle your eyes. We offer guiding at every level to suit your needs and wishes. If you select a multi-day program, we will create a plan that includes multiple sites that maximize your diving experience across a range of cave configurations and features.
